Product description:

High glossy, white and microporous coated PE photo paper with an outstanding metallic surface effect. Manufactured for commercial inkjet Dry Minilab printing systems.

Product characteristics:

- Extraordinary and extravagant metallic structured surface
- Excellent image sharpness
- Vivid colours
- High colour consistency and colour gamut
- High opacity
- Excellent light fastness
- Water resistance and outstanding lay-flat performance
- Fast and immediate smearless drying

Fields of application:

Exclusive promotion, fashion event, high-end photo gifts, wedding photography, baby christening & baptism photos, greeting cards.

Recommended printers:

Usable on all commercial inkjet Dry Minilab printing systems like Epson, Fuji and Noritsu.

Recommended storage conditions:

Temperature	15-25 °C
Relative air humidity	40-60 %

Protect from direct sunlight. Please store the material only in the original packaging under normal climatic conditions. We recommend letting the material adapt to indoor climate at least 24 hours before usage.

Technical specifications:

Weight	240 ± 7 g/m ²
Surface	metallic glossy
Colour	white
Thickness	235 ± 6 µm
Gloss (60°):	50 ± 5 gloss units
Opacity	> 96%
CIE whiteness (D65/10°)	> 123
Laminability:	hot and cold
Flame retardant	no
CIE L*a*b*:	L* = 91 a* = 0.2 b* = -5.2

Notes:

Before printing on our Tetenal spectra jet media, please ensure that the paper is compatible with your inkjet printer. We accept no liability for poor print results when the reason for this, such as use of non-proprietary inks, lie outside our control. The specifications of the material may change without express notice being given. The information in this data sheet is for guidance only.
