133054*	31.0 cm x 65 m	2 rolls	250 g/m ²

Product description:

White, microporous coated PE photo paper with a Lustre surface. Manufactured for commercial inkjet Dry Minilab printing systems.

Product characteristics:

- Pin-sharp details
- Vivid colours
- High colour consistency and gamut
- High opacity
- Excellent light fastness
- Water resistance
- Outstanding lay-flat performance
- Fast and immediate smearless drying

Fields of application:

Photo and panorama prints, portraits, wedding photography, baby christening & baptism photos, greeting cards, photo gifts.

Recommended printers:

Usable on all commercial inkjet Dry Minilab printing systems like Fuji Frontier DL 600, DL 650, Noritsu D502, D702, D705, D1005, QSS Green, QSS Green II, Epson SureLab D700 and D3000.

* For use in Fuji Frontier-S DX100 and Epson D700 and compatible printers.

Recommended storage conditions:

Temperature 15-25 °C
Relative air humidity 40-60 %

Protect from direct sunlight. Please store the material only in the original packaging under normal climatic conditions. We recommend letting the material adapt to indoor climate at least 24 hours before usage.

Technical specifications:

Weight	248 ± 6 g/m ²
Surface	lustre
Colour	white
Thickness	243 ± 6 µm
Gloss (60°):	18 ± 5 gloss units
Opacity	> 86%
CIE whiteness (D65/10°)	> 134
Laminability:	hot and cold
Flame retardant	no
CIE L*a*b*:	L* = 94.2 a* = -0.2 b* = -1.8

Notes:

Before printing on our Tetenal spectra jet media, please ensure that the paper is compatible with your inkjet printer. We accept no liability for poor print results when the reason for this, such as use of non-proprietary inks, lie outside our control. The specifications of the material may change without express notice being given. The information in this data sheet is for guidance only.
