

## Backlit Film 145 µm

### Tetenal Article Numbers:

131070 (61.0 cm x 20 m)

### Product Description:

Backlit Film allows the clearest images which are rich in contrast and a perfect effect when backlit. This polyester film is suitable for presentations in show cases. It has been developed for photorealistic reproductions. With its water repellent surface it is best when used in illuminated show cases even with variable temperatures and air humidity (good protection against condensation).

### Product Characteristics:

Backlit Film is translucent and coated on one side. The surface is water resistant when used in combination with pigment inks. The durable surface gives excellent photo quality results for brilliant images. The image is also protected against smudging, scratching and fast fading of colours.

### Applications:

- Posters for indoor and outdoor applications
- Presentations
- Show cases and graphic applications for photorealistic printouts
- Suitable for lamination.

### Remarks:

To avoid finger prints, please handle the Backlit Film only with cotton gloves. The printable side is always on the outside of the roll. To protect the film from soiling or abrasion we recommend lamination.

### Printer compatibility:

EPSON Stylus Pro Serie 7600 / 7800 / 7880 / 7890 / 7900 / 9600 / 9800 / 9880 / 9890 / 9900

Canon image Prograf Serie 8000 / 9000 / 6100 / 8100 / 9100 / 6200 / 6300 / 6350 / 8300

Further recommendations on demand.

### Physical Properties:

Weight	160 g/m <sup>2</sup>
Material Thickness	145 µm
Gloss (60°)	2.1 gloss units
Whiteness	80 +/- 2
